SUMMARY

Final-year IT undergraduate specializing in **Generative AI** and **Frontend Web Development**, building agentic AI systems, RAG pipelines, and full-stack applications with proven deployment experience.

EDUCATION

B.Tech – Information Technology **KIIT University**, Bhubaneswar 2022 – 2026
CGPA: **7.20** (current)

WORK EXPERIENCE

SAP ABAP Trainee Jun 2025 – Aug 2025

- Implemented algorithms, data-processing routines, and modularization techniques in ABAP.
- Practised Object-Oriented Programming (OOPs) and Core Data Services (CDS) views for data modelling.
- Worked with transaction codes (T-codes), Screen Painter, and developed a user Login & Registration Page.
- Completed foundational certification: *Exploring SAP Business Technology Platform*.

PROJECTS

1. Jigyasa.ai — Agentic AI Interview Platform 🌐 GitHub | 🌐 Live Demo

Python, FastAPI, LangGraph, LangChain, React 19, Tailwind CSS, Groq (Llama 3.3-70B + Whisper), Supabase (PostgreSQL), Vercel, Render

- Engineered a full-stack **agentic AI interview platform** to autonomously evaluate candidates across **4 screening rounds**.
- Architected a **LangGraph state machine** ensuring deterministic flow and serializable session state.
- Implemented **dual-track voice transcription** improving usability for non-native speakers.
- Built **ATS Resume Checker** and **Interview Prep Generator** with 20+ Q&As.
- Deployed on **free-tier infrastructure** ensuring reliability under constraints.

2. Bhagavad Gita Wisdom Bot — RAG System 🌐 GitHub | 🌐 Live Demo

Python, LangChain, Llama 3.3-70B, Groq LPU, FAISS, HuggingFace Embeddings, RAG, Flask

- Built a **context-aware RAG pipeline** with verse-backed insights.
- Indexed **1,100+ chunks** using FAISS for fast retrieval.
- Optimized latency via **Groq LPU engine**.
- Reduced hallucinations with improved grounding pipeline.

3. Multi-Modal Telegram Bot — Unified AI Assistant 🌐 GitHub | 🌐 Live Bot

Python 3.10+, Gemini 2.5 Flash, Groq Whisper v3 Turbo, fal.ai Wan 2.6, Pollinations.ai, OpenCV, PyPDF, SQLite3, Docker

- Developed a **multi-modal AI assistant** supporting 7 input types.
- Integrated Gemini + Whisper for OCR and transcription.
- Enabled **AI video generation** and structured extraction.
- Deployed with Docker for **24/7 availability**.

SKILLS

Languages	Python, JavaScript, C, C++, ABAP, HTML, CSS
AI / ML	LangChain, LangGraph, HuggingFace, FAISS, RAG, Groq LPU, Llama 3.3, Gemini, Whisper
Frontend	React.js (v19), Tailwind CSS, Vite, Framer Motion, Recharts, Figma
Backend & Infra	FastAPI, Node.js, Supabase, SQLite3, Docker, Vercel, Render, PythonAnywhere
Enterprise	SAP ABAP, Core Data Services (CDS), Screen Painter, T-codes
Concepts	Agentic AI, Generative AI, OOPs, DBMS, DSA, OS

CERTIFICATIONS

Exploring **SAP Business Technology Platform**, Foundational 2025
